

Quality Policy

Vision

To enhance the lives and health of diabetic and pre-diabetic patients through the development and commercialization of high quality, state-of-the-art, non-invasive glucose monitoring devices.

Mission

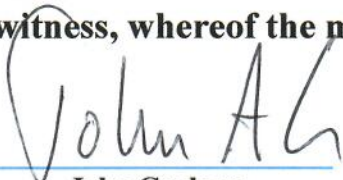

To develop, manufacture and market non-invasive devices for the medical arena;
To respond swiftly to customers' needs and market realities in relevant fields;
To build integrity and trust with customers, suppliers, colleagues and employees.

Policy

- * We commit to understand the needs of the customers and to supply products and services at a level of quality and reliability in accordance with the product specifications, as well as national and international standards.
- * We consider quality as a means of increasing efficiency and effectiveness. We allocate suitable equipment and skilled personnel toward realizing quality activities.
- * Integrity employees at all levels are fundamental to the company's success in research and development, production, marketing, sales, finance through provision services at a high level of quality and reliability. Fostering professionalism, interpersonal and interdepartmental communication and enhancement of motivation, are critical to our success.
- * We encourage the involvement of employees at all levels in the company's activities, thereby ensuring the preservation of the efficacy of the quality system and the quality of the company's products and services.
- * We foster our customers' sense of confidence in the quality of our products and services, and commit that their expectations are in fact reached. Understanding the needs of the customers is at the basis of the company's success.
- * We conform to quality standards compliance with EN ISO 13485:2012, ISO 13485:2003, the European Medical Device Directive (MDD) FDA-QSR and the Health Canada requirements (MDR).

The company management considers its suppliers and subcontractor's full partners in the quality and excellence of Integrity Applications' products and/or services. Therefore the company is committed to engage solely with suppliers and subcontractors who meet Integrity Applications' quality requirements and who are capable of supplying products and/or services at the required level of quality.

In witness, whereof the management has signed:

John Graham
President & CEO
